DETAILED ACTION

Status of Claims

Claims 1, 5 and 7 were previously presented, Claims 2, 4 and 6 are cancelled, Claim 3 is as originally filed, and Claims 8-10 are new.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toyooka et al (US 6,290,789 B1).

Toyooka et al is applied as discussed in the office action mailed 6 November 2007.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Toyooka et al as applied to claim 1 above, and further in view of Kondo et al (US 6,024,808).

Toyooka et al discloses the invention substantially as claimed. However, Toyooka et al does not disclose a seamless tube as in Claim 9. Kondo et al teaches making a seamless steel pipe by hot working (abstract). A round billet is pierced and rolled to a hollow shell (column 3, lines 11-15). It would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare the steel base pipe would be prepared as taught by Kondo et al, since Kondo et al teaches rolling applies light reduction to the cast steel in order to improve metallographic structure (column 5, lines 66 and 67).

Allowable Subject Matter

Claims 5, 7 and 10 are allowed.

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Regarding Claims 5 and 8, Toyooka et al teaches that the steel is rolled at a temperature not less than 400 °C as stated by applicant. Claims 7 and 10 depend upon Claim 5.

Response to Arguments

Applicant's arguments with respect to Claims 5 and 7 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Applicant's arguments have been fully considered but they are not persuasive. Toyooka et al teaches all of the claimed ranges broadly with the exception of the overlapping ranges of S and Si. S and Si still read on the claimed invention where the claims do overlap. Overlapping or broad ranges are sufficient to establish a prima facie case. See MPEP § 2144. Regarding the yield and tensile strengths (YS and TS, respectively), applicant does not address the examples where YS = 99,786 psi and TS = 136,700 psi. The process of making the steel tube is not claimed in Claim 1.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
